

6 WAYS CFIB can help you get back to business!

CFIB has a proven track record of helping members through difficult times like floods and fires—we are committed to doing the same during the COVID-19 pandemic and as businesses get back to business. Your health, your employees' health, and your business's health are our #1 priority.

As provinces reopen their economies, we've put together information and tools to help you to get back to business.

1. FIGHTING FOR MORE GOVERNMENT SUPPORT

We're pushing governments to provide more relief measures for small businesses during the COVID-19 outbreak and as businesses reopen.

We will continue to ask governments to:

- Expand the qualifying criteria for many small businesses that have fallen between the cracks of government programs.
- Monitor CECRA, the rent/mortgage relief program for SMEs, to ensure fairness and participation.
- Extend current program timelines to ensure businesses have the support they need for as long as they need it.
- Introduce additional support measures to help SMEs through the recovery period.

See the most recent measures governments have put in place to support small business at cfib.ca/covid19#govt.

As we push governments to support businesses, make your voice heard: sign our petition at cfib.ca/covidpetition.

2. BEST PRACTICES FOR GETTING BACK TO WORK

As provinces reopen sectors of their economies, it is important you ensure that you follow best practices for health and safety to keep your workplace clean and your employees and customers safe.

Some provinces may have stricter requirements than the guidelines below.

CFIB@CFIB.CA

BUSINESS OPERATION RECOMMENDATIONS

BUSINESS

- Keep informed of the provincial government announcements as to when your business can open.
- Ensure your business continues to follow regular employment standards and occupational health and safety compliance rules; please refer to your CFIB compliance checklist (in the appendix of this kit).
- Before returning to work, walk through your business to inspect/assess areas of risk of transmission in the workplace. This may require speaking to your Public Health authority.
- Consider changes to employee schedules to reduce the risk of transmission in the workplace such as allowing employees to work from home or creating a rotating schedule to avoid having all employees back at the same time.
- Assess business tasks to determine if you can minimize or eliminate ones that are not essential.
- Keep employee contact information updated regularly.
- Document your financial transactions, employee pay/attendance and all deferral/payment agreements.
- Understand symptoms: although there are a range of symptoms, the common signs are fever, cough, difficulty breathing and fatigue.
- Create a process on how customers will pick up orders/how orders will be delivered.
- Improve air circulation in the workplace.

2. BEST PRACTICES FOR GETTING BACK TO WORK CONT'D

BUSINESS OPERATION RECOMMENDATIONS CONT'D

CUSTOMERS

- If you are able, provide additional options for customer purchases, such as online or telephone ordering, delivery or curbside pickup.
- Consider cash-alternatives for collecting payments such as debit, credit and e-transfer.
- Mark physical distancing on the floor or assign staff to ensure physical distancing of 2 meters (6 feet).
- Minimize the number of people in the workplace.
- Restrict customer use of re-usable bags or containers.
- Post signage for best hygiene practices around the store or at the cash register.
- Communicate with your customers regularly to let them know what you are up to.
- Think about social media platforms that you can join to grow your customer base.

2. BEST PRACTICES FOR GETTING BACK TO WORK CONT'D

BUSINESS OPERATION RECOMMENDATIONS CONT'D

EMPLOYEES

- Plan which protective measures you will implement and communicate them to your employees. Encourage your employees to provide feedback on the measures to help determine the impact on their operations.
- Consider what technological changes can be made in the workplace such as a project management software or a time tracking software.
- Provide business updates to your employees 2 times a week to keep them posted on the ever-changing changing situation.
- Consider the methods of communication available to you and your employees and evaluate if they meet your needs.
- Educate your employees on the new policies put into place to reduce risk of transmission and contamination in the workplace.
- Ensure you follow the health and safety representative and committee guidelines, as per your provincial government requirements.
- Ensure you have hand sanitizer, soap and paper towel available, especially for employees that have in-person contact with customers.
- If your employees have any health-related concerns or recommendations, they should be encouraged to speak to their supervisor, and/or health and safety rep/committee.
- Remind employees of good hygiene practices such as hand washing and not touching their face.
- Mandate physical distancing of 2 meters (6 feet) during breaks or workplace interactions wherever possible.
- Limit in-person staff or external meetings as much as possible. Consider online and phone calls as alternatives.
- Consider installing barriers between employees and customers, such as plexi-glass or wearable employee reminder signs to physical distance.
- Train your employees on how to keep workstations clean and disinfect equipment. Areas with high traffic, such as cash registers, should be disinfected frequently throughout the day.
- Sanitize communal spaces like washrooms, entrances and counters that are frequently used.
- If you are able, provide a phone sanitizing station or cleaning wipes for this purpose.
- Postpone visits that are not essential to your business operations.
- If you are using personal protective equipment (masks, face shields, etc.), train your employees on how to use it properly.

3. ANSWERS TO YOUR QUESTIONS

How do I recall my employees back to work?

What if they refuse to come back?

What compliance issues and provincial standards do I need to follow as I reopen my business?

Every province has its own legislative requirements and recommendations that must be followed when reopening businesses, otherwise you could be fined. Not knowing could cost you!

We created a special Ontario FAQ for everything you need to know when it comes to reopening your business.

READ ONTARIO REOPENING FAQ

ONLINE COVID-19 FAQs

We are continuing to provide comprehensive answers to all your COVID-19 questions based on the latest information. Use our general FAQ to find information on:

- Government relief measures
- Your rights and obligations as an employer
- Which businesses have been deemed essential and non-essential
- Your employees' rights
- Prevention measures

Visit cfib.ca/covid19 for the full list of questions and answers.

4. TEMPLATES THAT HELP GET YOUR BUSINESS BACK ON TRACK

Download our customizable templates to easily put policies in place that keep your employees, customers and business safe.

OUR TEMPLATES INCLUDE:

Ontario COVID-19 Operational Plan

While Ontario does not require an operational plan, putting COVID-19 health and safety protocols and practices in place will help keep your business safe. We've put together an operational plan that will help you keep track of everything in one place.

DOWNLOAD YOUR PROVINCIAL OPERATIONAL PLAN TEMPLATE

Calling your employees back to work letter

As you prepare to reopen your business, recalling any staff from layoff will be your top priority. Use this template to let your employees know how they will come back to work.

"We're open" poster

Show your customers that your business is open and invite them to follow health guidelines. Find a copy of this poster in your kit.

CECRA request letters

Invite your landlord or renter to participate in the Canada Emergency Commercial Rental Assistance Program.

Notice to visitors

If you welcome visitors in your business, you might want to remind them to follow the safety measures you've put in place. This sign can help you communicate your expectations clearly and stop unsafe behaviour at the door.

Emergency preparedness

Emergencies can happen at any time. Our five-step checklist will help you identify risks to your business and make an emergency plan to deal with them—including the coronavirus pandemic.

Sick policy

Having an attendance or sick policy is a best practice at any time. It lets your employees know their rights and responsibilities regarding time off for sickness, reducing confusion and frustration.

Download all our templates at cfib.ca/covidtemplates.

5. OUR BUSINESS HELPLINE— REAL PEOPLE, REAL ANSWERS

Speak with an expert about interpreting both the required and recommended steps to reopen your business. Make sure you're compliant to avoid a fine!

For example:

- *Every province has its own health and safety requirements which govern various sectors and industries. Be prepared to implement these as you reopen your business.*
- *The Federal government introduced many relief programs to help SMEs. Which program(s) is your business eligible for?*
- *Many provincial governments have initiated relief measures aimed at helping businesses defer taxes and reduce operating costs. Which ones are available to your business?*

With counsellors in every province, the answers are a quick phone call away!

OUR BUSINESS COUNSELLORS CAN HELP!

Since the COVID-19 crisis began, we have answered more than 20,000 calls from business owners looking for help with HR and access or advice on the federal and provincial programs designed to help.

6. GOOD PROTECTION IS GOOD BUSINESS

LOOKING TO BUY OR SELL PERSONAL PROTECTIVE EQUIPMENT? JOIN OUR “PPES FOR SMES” GROUP

As governments start to lift restrictions and reopen the economy, access to personal protective equipment (PPE) is one of independent business owners’ top concerns, according to our members.

To help you reopen your business safely, we built a Facebook group to connect you directly with other businesses looking to buy or sell PPE.

FOR BUYERS

You can see all the offers from providers and contact the one that suits your needs.

FOR SELLERS

Post your offer using our clear, easy-to-use template to ensure buyers can both find you and contact you.

Don’t have a Facebook account?

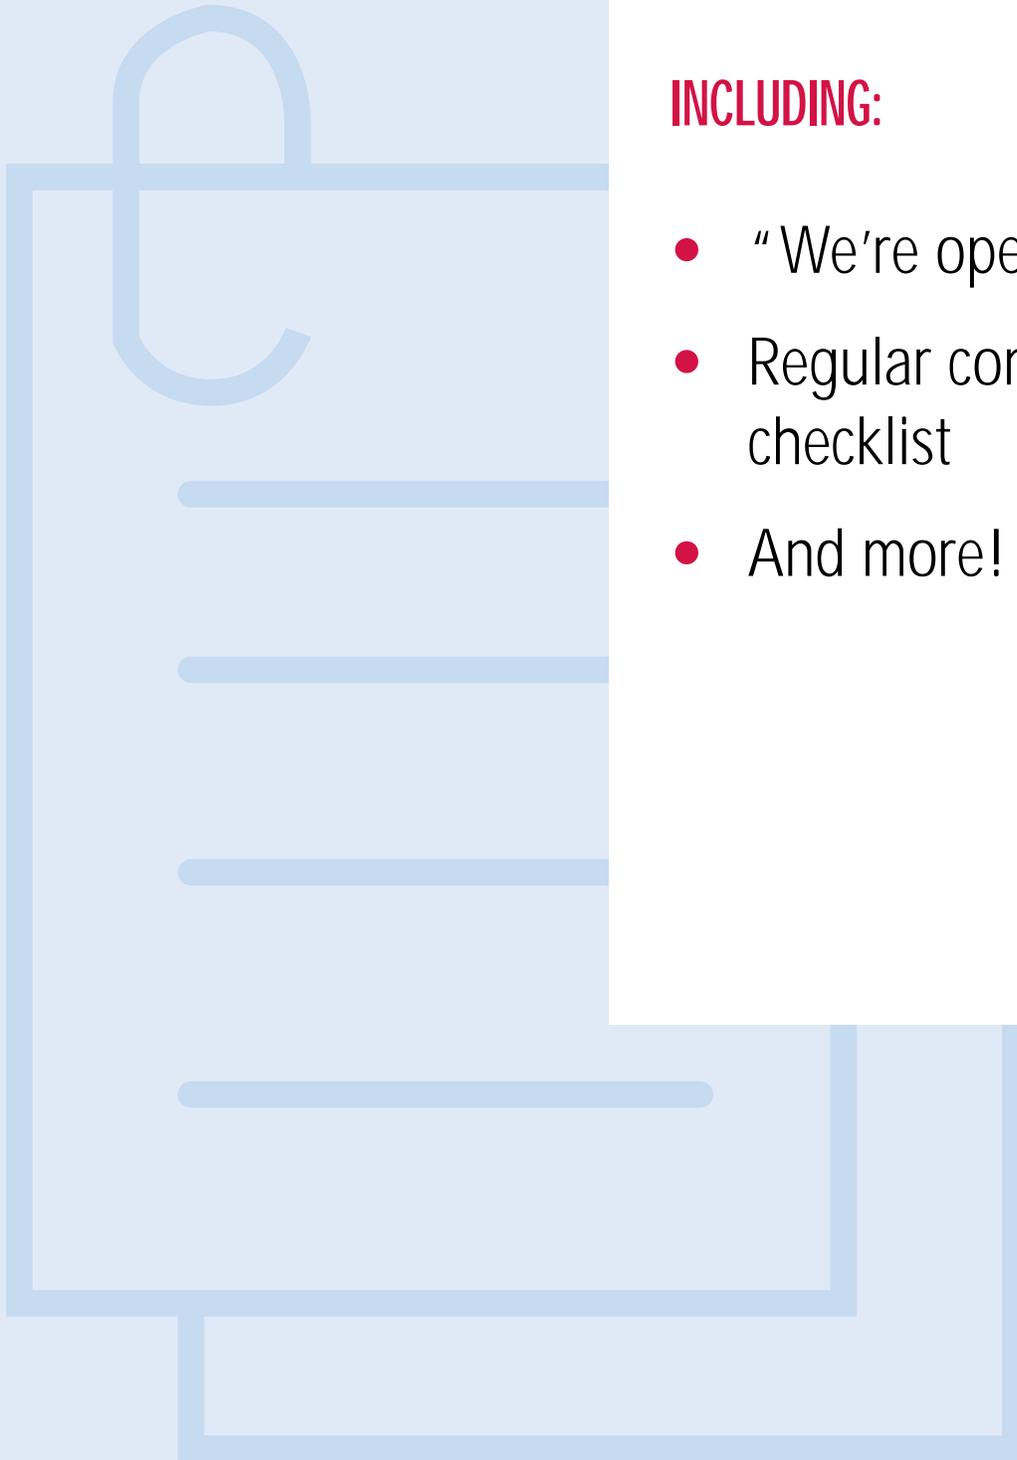

You can set one up in less than a minute using any email address or mobile phone number.

Alternatively, you can email us at ppe@cfib.ca for support.

Some provinces are also making information about accessing PPE available. Visit cfib.ca/covid19#ppe to learn more.

APPENDIX

INCLUDING:

- “We’re open” poster
- Regular compliance checklist
- And more!
